

2 player Premium model

# ASTEROIDS™

## RECHARGED

Atari & Alan-1 reintroduces a classic blockbuster, redesigned for today's arcade demands. This takes Atari's mega-hit of the early '80s and RECHARGES it with features that will keep players coming back for more.

Asteroids Recharged is easy to learn, but hard to master - a replay natural! The better your players become, the more difficult it gets. People keep on playing to best their previous scores. This is further enhanced by Alan-1's exclusive Major League eSports (MLEs) app & platform.

The object of the game is to maneuver your spacecraft quickly enough to blast and destroy streams of asteroids and UFOs before they can destroy the player's ship.

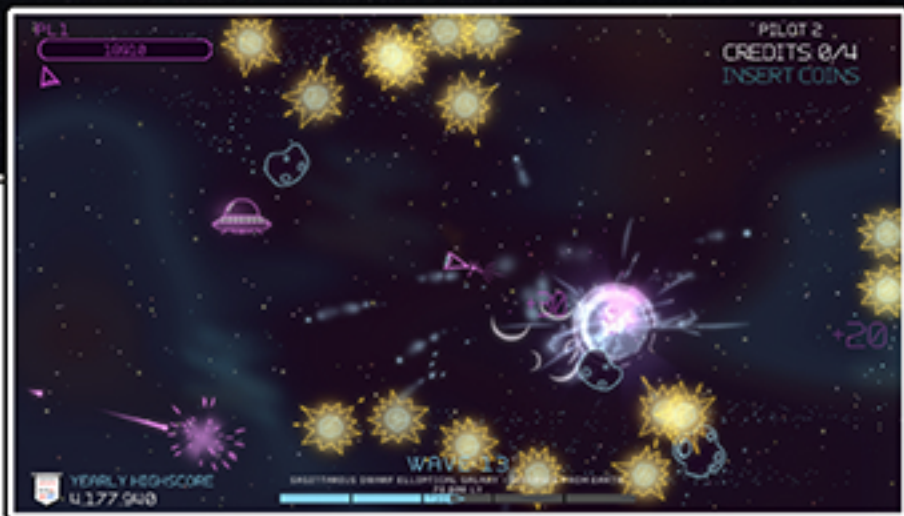

A direct hit on a large asteroid breaks it in two. A hit on one of these breaks it into two still smaller asteroids, a final hit on a small asteroid destroys it completely.

There are three types of UFOs which may enter the screen - one that drops a random power up to reward the player with a temporary advantage, then two which are hostile and may destroy the player's ship.

Power-ups make the game more exciting and give the player a sense of power. When all asteroids have been destroyed, the wave progresses to the next. At the end of a galaxy a challenge wave will put player skills to the test.

#### Classic Controls.

The original push-button control layout has been faithfully recreated for Asteroids Recharged, enhanced with LED lighting that is tied. Rotate left or right, thrust, fire, and hyperspace provide full control over your starfighter.

#### Scoring.

Small Asteroids.....	10 points
Medium Asteroids.....	20 points
Large Asteroids.....	30 points
XL Asteroids.....	40 points
Fractured Asteroids.....	50 points
All UFOs.....	150 points

Extra ships are awarded at 10,000 points by default. Hit targets in succession (without missing) to multiply point values for bigger scores.

#### Spectacular Visual & Audio Effects.

Designed to maintain the look of the original Asteroids, while stepping into the 21st century: 4K monitor provides sharp visuals, while the computer pumps out more objects and explosions than were ever possible in previous Asteroids games.

Captain Ace will guide players via voice-overs, while the 2.1ch system provides the music and sound FX that keeps players immersed into this action packed interstellar world.

**Leaderboards + Major League eSports.** Play and compete for high scores again thanks to both local and online leaderboards.

Alan-1's exclusive Major League eSports (MLEs) app allows players every where

to enjoy a number of features including free game accounts, continue from where they left off, posting scores to the online leaderboards, finding a game near them, unlocking & tracking achievements, and being notified when their score has been defeated.

#### Physical Effects.

Real cabinet effects help this video game stand out from others. From wind on the player's hands when they push thrust, to two different rumble motors, and a pinball knocker that indicates when a player dies - and turns heads when it happens.

#### Optional eTicket Redemption Support.

Operators can activate the ticket feature to award tickets for gameplay. Works with any existing cashless card system.

#### Dimensions.

Height: 82.25"  
Width: 32"  
Depth: 30"  
Monitor: 32" 4K, HDMI

#### Blast Off For Higher Profits.

Contact your Alan-1 authorized distributor for more details and pricing. A 3-player Deluxe model with a 55" monitor is also available as a great option for FECs.
